ANUSHA R

FULL-STACK ENGINEER

Hassan, Karnataka, India | anusha.r1018@gmail.com
LinkedIn | GitHub | Portfolio

SUMMARY

Full-stack engineer with **4 years** of experience building clinical web applications for hospital workflows using React, TypeScript, Ruby on Rails, and PostgreSQL. Delivered **392** enhancements, defects, and security fixes across **5** Oracle Cerner clinical portfolios, including **67** high-priority issues and **50+** security vulnerabilities. Strong in accessibility, authentication, automated testing, CI/CD, and Agile delivery.

SKILLS

Languages: JavaScript (Advanced), TypeScript, HTML5 (Advanced), CSS3 (Advanced), Ruby, SQL, Tailwind CSS

Frontend: React.js, Next.js, React Hooks, Redux Toolkit, reusable components, responsive design, accessibility (WCAG), performance optimization, Vite, Webpack

Backend & Data: Ruby on Rails, REST APIs, FHIR, PostgreSQL, Node.js, authentication, authorization, role-based access control, schema design, web security

Testing & Quality: Jest, RSpec, Minitest, unit and integration testing, ESLint, SonarQube, code review, debugging

DevOps & Delivery: Jenkins, CI/CD, Docker, GitHub Actions, Git, Render, Vercel, Splunk, Postman

Workflow: Agile/Scrum, Jira, Slack, Figma, Artifactory, AI-assisted development (Claude, Codex)

PROFESSIONAL EXPERIENCE

Application Software Engineer II (promoted from Level 1) - Oracle Cerner, Remote

Sep 2022 - Present

Build React/TypeScript frontends and Ruby on Rails/FHIR services for hospital clinical products, supporting feature delivery across clinical workflows.

- Owned end-to-end feature delivery across **5 clinical portfolios**, translating business requirements into React.js UI, RESTful API, and PostgreSQL solutions with maintainable, well-documented code.
- Resolved **67 high/critical-priority issues** across frontend, backend, and third-party FHIR integrations while partnering with product and backend teams in a remote Agile/Scrum environment.
- Rebuilt allergy data flows across **3 clinical applications**, improving onset precision, provenance, duplicate detection, audit metadata, and NKA/NKMA handling.
- Modernized **5 Ruby services** to **Ruby 3.4 and Rails 8** while remediating **50+** tracked security vulnerabilities and reducing security debt.
- Designed consent-aware patient-context features with care-unit authorization rules and emergency-access audit trails to support privacy and HIPAA-aligned workflows.
- Corrected interoperability and patient-context defects across **3 modules** to reduce duplicate records and stale safety indicators.
- Diagnosed cross-stack authentication and client reliability issues while maintaining Jest and RSpec test suites and contributing to Jenkins CI/CD releases.

SELECTED PROJECTS

CareerPilot - Full-Stack Job Application Platform | GitHub

React 19, TypeScript, Rails 8, and PostgreSQL application deployed on Render with Docker and GitHub Actions.

- Designed and deployed a multi-user platform unifying **12 job sources** into a **6-stage** workflow, with REST endpoints for applications, interviews, and administrator tools.
- Implemented authentication, authorization, and role-based access control using BCrypt, encrypted HTTP-only cookies, and database sessions; validated releases with Minitest, ESLint, and TypeScript in GitHub Actions.

Ramwell Store - Performance-Focused E-Commerce Catalog | GitHub

Next.js 16 App Router, React 19, TypeScript, and Tailwind CSS 4 storefront deployed on Vercel.

- Implemented custom row virtualization for **2,160** typed product configurations across **30 models**, rendering only visible rows with responsive column counts and overscan.
- Built debounced search, filtering, sorting, saved items, and a validated demo checkout using Server Components, dynamic routes, next/image, and next/dynamic code splitting.

Accessible Clinical Results Dashboard - Frontend Project | GitHub

React 19, TypeScript, and Vite dashboard for synthetic clinical results, deployed on GitHub Pages.

- Converted **8 lab results** across **3 panels** into a searchable, keyboard-friendly review workflow with status filters and an abnormal-results queue.
- Applied WCAG-aligned semantic HTML5, responsive CSS3, skip links, ARIA live regions, and reduced-motion support with automated ESLint and TypeScript checks.

EDUCATION

B.Tech, Computer Science and Engineering - Dayananda Sagar University, Bengaluru (2022) | CGPA: 8.27/10.0
